

Amendments to the Specification

Please insert the following paragraph on page 7, between lines 7 and 8 as follows:

For ease of description, first lines 147a, 147b and second lines 148a, 148b are shown in Figs. 2-4. The first lines 147a, 147b are defined at the outer circumferential surface 150 to be parallel with the piston axis 170 and to intersect the center axis (147) of piston pin 142. The second lines 148a, 148b are defined at the outer circumferential surface 150 to be parallel with the piston axis 170 and to be spaced 90° circumferentially from the first lines 147a, 147b. Each under cut 153 is spaced circumferentially away from each of the first lines 147a, 147b and from each of the second lines 148a, 148b.
